Join the new era
of hardware token mining

SpiderMiner.

What are Crypto project's looking for?

Participation - promoting loyalty and long term member commitments

Additional marketing - with hype, buzz and memes

Gain token holders - more exposure

Higher TVL - tokens locked up

Token value increase - steady growth through more adoption

More token utility - more reasons for users to participate in your project

More partnerships - wider recognition and greater reach

THE SOLUTION — a high-spec multitoken miner to protect and earn.

SpiderMiner.

high-speed VPN router

DAO voting machine

Metaverse protection aid

decentralized KYC (in development)

bandwidth monetization machine (future)

Spider Miner – a unique hardware mining opportunity.

Helping your community to participate and grow

What are the benefits for your project?

Create a mining group

get access to all projects in the group and their communities increasing token exposure.

$SPDR Token Swap

get access to all projects in the group and their communities increasing token exposure.

Fully transparent & verifiable

peace of mind through trustless open transactions.

Low cost of participation

real world product with a real world value for all partners and their communities.

What are the benefits for your community?

Access to a High-Spec Spider Miner
that is also eco-friendly

Military grade VPN
with multi-purpose hardware

Multi-Token long term mining
diversified mining for all miners, spreading risk and
improving rewards

Proof of Privacy Staking (POPS)

The heart of Spider Miner

Spider Miner operates securely off chain via off chain workers (ocw) to minimize costs, protect the miners anonymity and provide additional security with on chain governance.

POPS In Detail.

Staking

Miners are required to constantly stake a minimum of $10 worth of each token during the mining period to validate the protocol.

Security

Each mining validator has to participate to have to participate fully in verifying and contributing to Spider VPN's world class service.

Reliability

Our encrypted system checks and reports on the current and historical status of the miner reliability.

Validity

Each validator is validated by its unique mac address & chipset serial numbers.

Data protection throughput

Miners are expected to achieve and maintain a minimum quantity of protected data throughput.

Net-zero supercharged mining.

The World's Most Eco-Friendly Crypto Miners.
The Spider Miner Has Net-Zero Carbon Emissions!

Buy a Miner - Plant a Tree

For every miner sold, we will donate $5 to the Tree-Nation project.

This project has already planted over 12m trees and offset over 1.5b Tonnes of CO2.

Low Power, Low Emissions

Spider Miners have very low power requirements, even when operated non-stop.

Their power consumption is equivalent to a typical LED bulb.

Mine Crypto, Earn tokens & Protect the Environment

You can earn crypto and still be guilt free - not only do we offset your mining carbon emissions, but we actually remove more carbon over the lifetime of the trees that are planted.

A Metaverse Protection AID.

Help your community to.....

Protect their Metaverse at the hardware Level.

Protect their Identity in the Metaverse.

Protect their IP address & location.

Protect themselves from hackers.

SpiderMiner.

Multiple Tokens to Mine

1

World Class VPN

2

Worldwide Certification
FCC, CE, RMC, IC

3

Increase Token Holders

4

Increase TVL

5

Increase Token Utility
